DETAILED ACTION

Final Rejection

Response to Amendment

1. Claims 1-16 are pending. Claim 1 is amended in the amendment dated Dec. 11, 2003.

2. The rejection of claims 1-16 under 35 U.S.C. 103(a) as obvious over Kvietok et al. (US 5,445,747) is withdrawn upon Applicant's amendment to the instant claim 1 and further review and consideration of the prior art.

Response to Arguments

3. Applicant's arguments filed December 5, 2003 have been fully considered but are rendered moot in light of the new grounds of rejection below.

New Grounds of Rejection

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 1751

6. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

7. Claims 1-16 are rejected under 35 U.S.C. 102(b) as being anticipated by Hauwermeiren et al. (WO 98/06811).

Regarding claims 1-4, 7-10, and 13, Hauwermeiren et al. teach a granular and powder detergent and cleaning product comprising one or more antibodies granulated with salts e.g. sodium sulfate and calcium sulfate. Please see page 7, 4th paragraph and example 7 formulation IV where Hauwermeiren et al. illustrate a detergent formulation comprising dry additives including antibody, enzymes, bleaching agent and a balance of sodium sulfate which encompasses greater than 80% of the formulation consists of an alkali metal salt. See page 57-58, example 7, formulation IV.

Regarding claims 11-12, 15-16, Hauwermeiren et al. that the cleaning process is carried out at 5 degree C to 95 degree C. The pH of the treatment is preferable from 7 to 11. See page 47, paragraph 6.

Regarding the claimed chemical equilibrium constants, the prior art, Hauwermeiren et al., are silent as to the chemical equilibrium constants for its antigen and do not explicitly teach the limitations of K_d as recited by the instant claims.

Art Unit: 1751

However, it is reasonable to presume that said limitations are inherent to the invention because the presumption is supported by the use of similar components (i.e. antibodies) and in the similar treatment steps (i.e. granulated with alkali metal salts) to produce a detergent composition. The burden is upon the applicant to prove otherwise. *In re Fitzgerald*, 205 USPQ 594.

Accordingly, the broad teachings of Hauwermeiren et al. appear to anticipate the material limitations of the instant claims.

Conclusion

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
